

What is a lead acid battery?

Lead-acid batteries are usually found in cars and trucks. The next type of battery acid is nickel-cadmium (NiCd). NiCd batteries contain nickel and cadmium plates along with potassium hydroxide (KOH) and distilled water. These substances are mixed together in order to create an electrical current.

What is the difference between AGM lead acid battery vs gel cell battery?

AGM Lead Acid Battery Vs Gel Cell Battery Absorbed Glass Mat (AGM) These batteries contain only enough liquid to keep the specially designed glass mat wet. The glass mat is made to wick the battery electrolytes between the battery plates. If the battery is broken no free liquid leaks out.
