Pacific Batteries was established in 1965 and is a 100% Fijian, locally-owned company. The company is ISO 9001:2008 QMS Certified and has set up a battery recycling plant in 2009. 99% of Pacific Batteries' employees are locals.

First make a backup of your setting using X Acquire. There is a small battery in your camera that keeps enough power on the memory holding your settings. It is recharged by the main battery. If this internal battery is faulty - then when you remove the battery you will lose your settings. This has been a common issue with multiple Fuji cameras.

Worked perfectly fine for taking photos. After I got XT4 I converted the XT2 to a webcam for my desktop computer for zoom meetings. Went to switch a battery after an hour long video meeting and the battery wouldn't pop out. Heat of ...

In-camera battery indicator. The battery indicators in cameras are based on actual voltage of the battery. However, since the Fuji batteries have quite a different ...

4.6 out of 5 stars

I then have two spare, an Xpro, £12 and one that just says "Battery Pack" £8. So far no problems with any, all rated at 1260mAh and both the non OEM charge OK in the Fuji charger. Last edited: May 6, 2018

My Fuji XT-3 reverts back to the factory settings every time I take the battery out. Would anyone know how

to fix this problem. ... Never remove battery when camera is switched ON Retry. Report-- hide signature
--Good judgment comes from experience Experience comes from bad judgment baobob's gear list: baobob's gear list.

As a cautionary note, Fuji states explicitly in the X-T3 owners manual that the camera should be powered off before opening the battery cover and/or changing the battery. It may not be relevant to the issues your camera is having, but it's probably best to follow their specific instructions when it comes to dealing with any electrical connections on a camera, ...
