

How much does the range-extended battery cost

How much does an extended range battery cost?

This is the cost for the standard range and the extended range battery pack. Other automotive journalists found a local extended-range battery with 320 miles of range for \$35,960 and a standard-range battery with 230 miles of range for \$28,556.

How much does a Ford extended range battery cost?

Searching Ford parts online, I found pricing for both the extended-range battery and the standard-range battery at my local Ford dealer. First, the extended-range battery, the one with up to 320 miles of range, is currently priced at \$35,960. Next, the standard-range battery, with 230 miles of range, is currently priced at \$28,556.

How much does a range extender cost?

A range extender stops the battery from running out or overheating, meaning that your battery life is extended, and the health of your battery improves. How Much is a Range Extender? Range extenders can be expensive. Prices begin at \$200 and can range all the way up to \$1000. The price can vary depending on the model and year of your EV too.

How much does a 70-mile range battery cost?

According to Ford's configurator, that 70-mile range cushion will cost F-150 Lightning XLT buyers a pretty penny. Starting at \$54,669 with the standard battery, opting for the Extended Range Battery adds \$19,500--roughly the cost of an entire Ford Maverick --to the F-150 Lightning XLT's base price.

How much does a battery cost?

Next, the standard-range battery, with 230 miles of range, is currently priced at \$28,556. In both cases, I'm using the word "currently" because we have pretty high inflation at the moment, and tight supply chains make producing these batteries tough, which is artificially raising the prices.

How much does a tesla range extender cost?

Customers who order a brand-new pickup can opt for the range extender and pay a \$500 non-refundable deposit to get priority installation after production starts. When will it be available? Tesla estimates that it will start production of the Cybertruck range extender in the first part of 2025, with installations slated to begin shortly after that.
