

## How to replace the crank power meter battery

How do you replace a meter battery?

To replace the battery in a Stages Power meter, remove the two screws by turning counterclockwise using a small Phillips head screwdriver. For a new meter, pull the plastic tab to remove the battery, then re-install. For existing meters, lightly press on the edge of the battery to pop it out, then replace it with a new battery with the +(positive) side facing out. Reinstall the screws to secure the battery.

How do I replace the battery on my PowerMeter?

To replace the battery on your drive-side powermeter you will need a new CR2032 lithium ion battery and a 1.5 mm hex tool (included with your powermeter). To replace the battery on your non-drive-side powermeter, you will need a new CR2032 coin lithium ion battery. Do not pry your battery cap.

How do you remove a battery from a power meter?

To remove the battery from a Stages Power Meter, rotate the battery door into the 'open' position and gently lift outwards to remove the battery door from the unit. Use your finger to tilt the battery and lift it from the compartment. Avoid using sharp tools to remove the battery, as they can cause damage to the electronics within the power meter. To install the battery, follow the same steps in reverse order.

Where is the battery located on the rival AXS power meter?

The AAA lithium battery used by the Rival AXS power meter is user-replaceable and contained within the DUB spindle of the crank assembly, accessible from the non-drive side (left from the riding perspective). See the "DUB-PWR Battery Replacement" section of the SRAM Power Meter user manual for full instructions. Have more questions?
