

What happens if a lead acid battery is down?

All lead-acid batteries are at risk of sulfation, which causes their inner battery plates to degrade over time, and become less conductive. Sulfation is the most common reason for a lead acid battery to lose a majority of its charge. Just because your battery is down doesn't mean it's out completely!

How to rejuvenate a lead acid battery?

This means you can use the same methods to rejuvenate all lead acid batteries. Although if you have a maintenance-free or sealed lead acid battery, they will have hidden caps that will need to be removed before you can revive them. So to rejuvenate your battery, you need to remove the sulfation build up on the cell plates!

Can a lead acid battery be revived?

All lead-acid batteries use essentially the same principles. This means you can use the same methods to rejuvenate all lead acid batteries. Although if you have a maintenance-free or sealed lead acid battery, they will have hidden caps that will need to be removed before you can revive them.

How do you recondition a lead acid battery?

Steps to Recondition a Lead-Acid Battery
Safety First: Wear safety goggles and gloves to protect yourself from the corrosive acid.
Remove the Battery: Take the battery out of the vehicle or equipment.
Open the Cells: Remove the caps from the battery cells. Some batteries have screw-in caps, while others have rubber plugs.

What is a lead acid battery?

Lead acid batteries are a type of wet cell battery. Every cell contains two different lead plates in a fluid containing sulfuric acid, called an electrolyte. If the electrolyte level in your battery gets too low, the lead plates are exposed to air and sulfation can occur.

Can a lead acid battery be overcharged?

You can overcharge your battery, which causes excessive heat and can kill it within a matter of hours. Store your lead-acid battery in a cool and dry place. The ideal temperature to store your lead-acid batteries at is 68 degrees F. Significantly higher or lower temperatures can shorten your battery life.
