

What is a lithium ion cabinet?

What is a lithium-ion cabinet? A lithium-ion cabinet, also known as a battery charging cabinet or battery safety cabinet, is a special fireproof storage unit designed to charge and safely store multiple batteries simultaneously.

How do I choose a battery storage cabinet?

No matter what safety level you choose, all cabinets offer these key safety features: If you only want to store batteries in the cabinet, choose the STORE version. If you intend to charge (active storage) batteries directly in the cabinet, then choose the CHARGE version.

What is a battery charging cabinet?

Organisation and tidiness: a battery charging cabinet enables batteries to be stored centrally and neatly. Efficient charging: The charging cabinet usually offers individual slots or compartments for each battery. This allows batteries to be charged simultaneously and efficiently.

How many batteries can a batteryguard cabinet hold?

Whether you have a great many batteries or just a few, large or small, the Batteryguard cabinet offers a solution for every situation. We offer compact models that charge 2 to 10 batteries and a spacious double-door safe where you can store up to 20 batteries.

How to store batteries in the Ion-line safety cabinets?

If you only want to store batteries in the cabinet, choose the STORE version. If you intend to charge (active storage) batteries directly in the cabinet, then choose the CHARGE version. ? Find out exactly how the safety concept of the ascos ION-LINE safety cabinets works in our video.

How does the batteryguard cabinet work?

The Batteryguard cabinet is also safe and easy to use for new personnel. It's simple: when you need to charge up your battery, you just open the cabinet and place the battery on the charger. Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery.
