

What is the CS free battery charger?

The CS FREE is the world's first fully portable battery charger and maintainer with Adaptive Boost to get your flat battery going quickly and safely - without the need for mains power. In other words, it's a 12V power bank for your vehicle that works with both lead-acid and lithium (12V LiFePO4) batteries.

How do you charge a CS free battery?

Connect to a power source and turn the CS FREE into a 5A smart battery charger. Charge and maintain any 12V lead-acid or lithium vehicle battery through mains power, solar panel or separate service battery. User-friendly, with straightforward operation and clear, easy to read displays.

Can CS free recharge a flat battery?

Replaces jump starters and boosters with Adaptive Boost - the safest way to revive your flat battery. Connect to a power source and turn the CS FREE into a 5A smart battery charger. Charge and maintain any 12V lead-acid or lithium vehicle battery through mains power, solar panel or separate service battery.

Can CS free charge a 12V battery?

CS FREE gives you the freedom to charge and maintain any 12V lead acid or lithium battery wherever you are - even if you're nowhere near a power outlet. Use it as a portable charger to top up your battery with mains power, or hook it up to a solar panel kit or 12V battery for complete charging freedom anywhere you go.

Can a CTEK CS free charge a car battery?

Now, though, CTEK have produced something different. The CS FREE is still a charger, but it's a portable one. That is, you can charge your vehicle battery even away from mains power. This is something that has never existed before, and for one very simple reason: It wasn't possible. It requires a lot of energy to charge a vehicle battery.

Can CS free trickle charge a battery?

The CS FREE can trickle charge (ie. provide a small amount of charge to keep a battery topped up, preventing it from losing charge). Depending on your battery you may be able to do this for a few days, or with a smaller battery, maybe even a few weeks before you need to recharge. Don't expect permanent charging away from mains power.

Charging a 12V battery from dead to full charge uses up a lot of power, so if you've done that once, make sure you recharge the CS FREE. 2) Constant trickle charging for months, away from ...

To be eligible for this PRO Deal, you must buy Bosch Professional 18V power tools, garden tools, measuring tools, both baretools or kits, startersets, batteries or chargers ...

Maintenance-free battery is absolutely maintenance-free. Maintenance of a car battery is not only about the manipulation of the electrolyte. At a minimum, as needed, it must be recharged from a stationary charger. And ideally, it is also desirable to monitor the cleanliness of the case. It is also useful to clean terminals from oxides and salts.
