

Why do automotive batteries need a label?

Automotive batteries require specific labelling to ensure safe operation and maintenance. Automotive components are often exposed to heat, so labels must withstand temperatures up to 150 degrees Celsius. Our heat-resistant and engine labels can provide clear identification and will not fade or distort over time.

What is a battery card?

The Battery Card is a custom Home Assistant card designed to display battery levels with various layouts and styles. It offers flexible configuration options, including different layouts, styles, and image customization based on battery levels. Install the repository as a custom repository in HACS: Open HACS.

What are automotive service labels?

Automotive service labels must be durable and instantly recognisable. Our self-adhesive labels are designed to withstand environmental conditions and provide clear, readable information that can be easily removed without leaving any residue. Automotive batteries require specific labelling to ensure safe operation and maintenance.

What are interior labels?

Interior labels can be applied to various interior car components, including the dashboard, seats, sun visors and more. We offer labels with different tack levels which are more durable than others and are resistant to wear and frequent use whilst still providing clear identification.

What are warning labels & tyre pressure labels?

Warning labels provide necessary instructions and warnings for car operators. Materials designed to meet international safety regulations and provide clear identification are often considered. Tyre pressure labels provide information about the safe operating range of the tyre.

What are car exterior labels?

We offer labels with different tack levels which are more durable than others and are resistant to wear and frequent use whilst still providing clear identification. Car exterior labels can be used across the exterior of the vehicle, whether that be in the engine bay, underneath the vehicle or on the rear indicating the model/brand.
