

SSOE supports the battery manufacturing process at every point in the supply chain--from battery materials production to cell production, and battery assembly through battery recycling.

PET, an aliphatic-aromatic and semi-crystalline thermoplastic polyester of commercial and industrial importance, is one of the most widely used plastics in the world.

EBS proudly represents one of the most integrated plastic pipe manufacturing plants in Turkey and owes its success to following the latest developments in pipe manufacturing technologies. EBS Brand Pipes and Fittings fully comply with ...

In early 1980s Nan Ya plastic pipe factory (PVC pipe plant) was established in Chiayi, Taiwan, Nan Ya Plastics Corporation, the largest plastic pipe supplier and the most productive PVC pipe ...

As industry experts with over 30 years of experience in GRP production technology, we provide cutting-edge solutions for GRP pipe production. Find everything you need to become a ...

GF's piping systems can be used in various market segments (e.g. utilities, building services, industry) for a wide range of applications (e.g. ultra-pure water transport, dehumidification, ...

GF Piping Systems offers industry-leading flow solutions for sustainable battery production, featuring tailored plastic pipes as corrosion-free alternatives to metals.

Mixed with polyester resin it is the filling material of the pipe, it has got an important role in the wall structure and the increase of the pipe stiffness. Auxiliary materials: Further to these materials, some auxiliary materials are also needed for the production of sand-filled pipes. While processing, these (accelerator, initiator,

Charmi Engineering is a leading manufacturer of Polyester Resin Plant. There are two types of Polyester resin, Saturated & Unsaturated Polyester resin. Saturated Polyester resin is used in Pigment, Ink, Coil Coating, Thermo Plast, Soda ...

Polyester pipes for gas conduction . Dimasa Grupo manufactures all kinds of pipes and fittings in reinforced polyester with fiberglass (GRP), only for gases. Ideal for its high durability, minimal maintenance and adaptation. Our polyester pipes suit all types of projects for gas conduction, and can be customized and adapted to customer needs: color, diameters, accessories, resin...

Today, Umicore serves its battery materials customers in Europe through its cathode precursor and cobalt refining plant in Kokkola, Finland, and its battery materials plant in Nysa, Poland, which is the continent's

first industrial-scale ...

We provide cutting-edge technology to meet the high, conditioned standards of battery cell production. Pre-insulated pipes, fittings, valves, and process automation help with a fast ...

The new non-woven fabric pipe arrangement is independently researched and developed by our company. After more than three years of research and development, it has now reached the ...

With more than 60 years of experience in plastic piping systems, GF Piping Systems supports the battery production and recycling industry's efforts to build the most sustainably managed factories worldwide. Our global teams developed application-oriented plastic piping solutions that are a corrosion-free alternative to traditional metal solutions. High-performance, lightweight ...

The massive electric vehicle battery plant in southwestern Ontario should produce its first module this month as the project looks to hire another 200 employees before the end of the year.

As sealing experts, we can help you ensure passive protection against lithium-ion battery manufacturing hazards such as thermal runaway, fire, and the risk of explosion. With our airtight cable and pipe seals, you can easily achieve an ultra-low humidity environment and save on energy for dehumidifiers.
