

Can the battery in the battery cabinet be replaced when it is full

When should a car battery be replaced?

When the battery leaves the factory, the capacity is usually 100%, and the capacity of the battery will gradually decrease over time. If the battery capacity is less than 80% of the original capacity, then it's time to consider replacing the battery. Under regular use, the battery capacity usually decreases to 80% after about two years of use

Do I need a new battery storage cabinet?

Most batteries with greater runtime capacity are also physically larger and require more battery storage space. If your current battery cabinet cannot store the larger batteries you're moving to, a new or retrofitted battery and energy storage system will be required. We can help you get the right battery storage cabinet to match your new UPS.

How do I choose the right battery storage cabinet?

We can help you get the right battery storage cabinet to match your new UPS. Whether leveraging an existing battery cabinet through a retrofit or opting for a new cabinet altogether, you'll also need to consider connector compatibility, cable size and the possibility of re-wiring.
