

Is China's solar photovoltaic industry about to close?

China's solar photovoltaic (PV) industry's protracted battle with overcapacity may be drawing to a close, after years of bruising price wars and rapid capacity build-up plunged half the sector into the red, forcing closures and disrupting expansion plans, analysts say.

Why are China's solar companies undercutting each other?

China's world-dominating solar firms have been forced to sell below cost after a breakneck buildup in capacity to feed China's renewables boom. Companies are undercutting each other to maintain market share, and most are expected to report losses this year, BloombergNEF said in a report earlier this month.

What are China's investment guidelines for solar PV projects?

BEIJING, Nov 20 (Reuters) - China's industry ministry on Wednesday finalised investment guidelines for solar photovoltaic (PV) manufacturing projects in an effort to rein in overcapacity, according to a notice on the ministry website. The guidelines direct companies to ensure a minimum capital ratio of 30% for solar PV projects.

Are Chinese solar companies facing a reckoning next year?

Xiaohua Xu in Shanghai, on Dec. 3. (Qilai Shen/Photographer: Qilai Shen/Bloomberg) (Bloomberg) -- Chinese solar manufacturers will face a reckoning next year, with overcapacity and a fierce price war forcing many smaller firms out of business, according to the head of Anhui Huasun Energy Co.

Should China's solar industry exit the market?

China's main solar industry association earlier this month called for rational pricing and urged companies to be more disciplined in bidding for projects. Over the summer, it said struggling manufacturers should exit the market as soon as possible.

Are China's solar panels struggling with overcapacity?

Photo: Reuters But the panel makers have added capacity at a faster pace with the result that despite the country's record-breaking installation of solar energy under its 2060 carbon neutral target, China's solar panel sector is grappling with overcapacity.

Massive overcapacity in China's world-leading solar industry has forced some companies into bankruptcy or restructuring and resulted in big losses at major manufacturers.

Alternus Clean Energy cancels \$60M solar acquisition, but remains undeterred--CEO Browne targets 3 GW capacity growth in renewable energy within five ...
