

What are China's solar PV exports?

In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Viet Nam also made these countries major exporters of PV products, accounting for around 10% and 5% respectively of their trade surpluses since 2017.

How much do solar panels export in China?

In 2023, solar PV module exports in China surpassed 212 gigawatts. Meanwhile, China's export volume of solar cells stood at 39 gigawatts that same year. The export value of solar photovoltaic equipment reached 52 billion U.S. dollars in 2022. Get notified via email when this statistic is updated. Access limited to Free Statistics.

Where do solar PV exports come from?

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination. Ember China solar export dataset provides the following information: The IEA has stated that China's solar photovoltaic exports account for 80% of the global market.

How many solar panels does China Export in 2023?

Solar modules, which are fully assembled solar panels, accounted for 90% (\$23.8 bn) of China's total solar exports by value in the first half of 2023. Over the last 12 months, China exported 111 GW of solar modules to Europe, the same amount as the total installed PV capacity of the United States.

Which country imports the most solar panels from China?

Outside of Europe, South Africa was the country with the largest absolute increase in imported solar panels from China. Module exports to South Africa saw rapid growth in 2023, with 3.4 GW exported to the country in the first six months of 2023, an increase of 438% (+2.7 GW) compared to the same period last year (0.6 GW).

How many solar modules does China Export to Europe?

Over the last 12 months, China exported 111 GW of solar modules to Europe, the same amount as the total installed PV capacity of the United States. With a total over the last 12 months of 19 GW, Brazil is the largest single destination for China's solar module exports outside of Europe.

In September 2024, China exported approximately 2.66GW of solar panels to the American market, representing a 4% increase from 2.55GW in August, but a 3% decrease compared to ...
