

What kind of battery does a desktop computer use?

Desktop computers use a battery that is similar in shape to a watch battery, except that it is slightly larger. The purpose of this battery is to hold the settings for the computer, including the amount of memory installed in the system and the current time and date.

How much does a laptop battery cost?

Have a good desktop, and a cheap laptop/netbook/smartphone/tablet for your portable needs. Batteries typically cost around \$150 and last 2-4 years with consistent use. If your power adapter, or power brick, is worn out, it will cost you an additional \$120.

How do I test my HP laptop battery?

Most notebook/laptop batteries are internal and as a result require replacement by a professional technician. HP provides a Battery Check tool that you can use to test your battery before ordering a new one. Go here to find several options for testing your battery: HP Notebook PCs - Testing and calibrating the battery (Windows).

Can a laptop battery be replaced?

Replacing a laptop battery may require expert tech assistance to avoid damaging the fragile internal components and electrical systems due to electro-static discharge. Most notebook/laptop batteries are internal and as a result require replacement by a professional technician.
