

# Do I need to pay taxes on energy storage income

Are electricity sales taxable?

This includes both sales of exported electricity and any Feed in Tariff. Any income from a domestic installation at a let dwelling is taxable (even though capital allowances are denied). The principal incentive for residential landlords is to improve the EPC rating (but your tenant will appreciate the lower energy costs).

Are Renewable Heat Incentive payments taxable in the UK?

No, domestic Renewable Heat Incentive (RHI) payments are generally tax-free in the UK. Homeowners receiving RHI payments for generating renewable heat typically do not have to declare these payments as taxable income. However, if you are running a business or using the system for commercial purposes, the tax treatment might differ.

Are domestic installations taxable?

Any income from a domestic installation at one's home is tax-free. This includes both sales of exported electricity and any Feed in Tariff. Any income from a domestic installation at a let dwelling is taxable (even though capital allowances are denied).

What are the tax rules for electricity installation?

There are two different sets of tax rules, depending principally on whether the installation is domestic or commercial. The contract documentation will state the type of installation. A domestic installation is normally mounted on the farmhouse roof (occasionally in the garden) and provides electricity solely to the dwelling.

Are solar panels taxed?

If you have installed solar panels on your property primarily for personal use, FiT payments are generally not taxed. However, if your solar panel system was installed with the primary purpose of generating income, you may need to declare these earnings to HM Revenue & Customs.

Are solar and energy storage installations subject to VAT?

All solar and energy storage installations, including maintenance to existing sites, should be subject to 0% VAT. This should include residential energy storage when installed as a standalone measure.
