

## Does the battery pack come with a charging cable

How do you charge a battery pack?

To charge, plug the supplied cable into the input port on the battery pack. Attach the other end, usually a standard USB, into a wall charger or other power source. Battery pack input ranges from 1Amp up to 2.4 Amps. Put simply, the bigger the input number, the faster it will recharge.

Does a USB port fit a battery pack?

Technically the standard USB port on your battery pack (aka power bank) will fit any standard USB cable. However, the amount of power it can provide may vary. A 1 amp USB port will charge your smartphone or tablet but may charge slowly, even if the battery is big enough to charge your smartphone more than once.

How long does it take to charge a battery pack?

In temperatures above room temperature, charging may be less efficient. Beyond 45°C (113°F), charging becomes impossible. Charging the 4.0 battery pack typically takes 2-2.5 hours, with 2.5 hours being the average at room temperature. While charging, the pack may feel slightly warm but should not be uncomfortably hot.

How many amps does a battery pack charge?

Battery pack input ranges from 1Amp up to 2.4 Amps. Put simply, the bigger the input number, the faster it will recharge. Most wall chargers deliver up to 2.4Amps, but it's worth checking the charger if you're in a hurry, as a 1Amp charger might take twice as long.

How do I charge my MagSafe battery pack?

Just plug a Lightning cable into the MagSafe Battery Pack for up to 15W of wireless charging. Short on time? With a higher than 20W power adapter, you can charge both the MagSafe Battery Pack and your iPhone even faster. And you can track the status of your charge on the Lock Screen.

What is a portable charger?

The answer is a portable charger. A lightweight power bank or mobile battery pack that you can carry anywhere. They go under different names: battery packs, power banks, portable chargers, fuel banks, pocket power cells and back-up charging devices to name just a few. But whatever you call them, they all do the same thing.

The Battery Charger. Depending on the country or region, the charger comes with either an AC wall adapter or a power cable. AC wall adapter: After inserting the AC wall adapter into the charger AC inlet (q), slide the AC wall adapter latch as shown (w) and rotate the adapter 90° to fix it in place (e) insert the battery and plug the charger in.
