What is a liquid cooled battery system?

Immersed liquid-cooled battery system that provides higher cooling efficiency and simplifies battery manufacturing compared to conventional liquid cooling methods. The system involves enclosing multiple battery cells in a sealed box and immersing them directly in a cooling medium.

What is liquid cooling energy storage electric box composite thermal management system?

Liquid cooling energy storage electric box composite thermal management system with heat pipes for heat dissipation of lugs. It aims to improve heat dissipation efficiency and uniformity for battery packs by using heat pipes between lugs and liquid cooling plates inside the pack enclosure.

What is an active liquid cooling system for electric vehicle battery packs?

An active liquid cooling system for electric vehicle battery packs using high thermal conductivity aluminum cold plates with unique design features to improve cooling performance, uniform temperature distribution, and avoid thermal runaway.

What is immersed liquid cooling module?

Immersed liquid cooling module and method for improving heat dissipation and temperature uniformity in high voltage battery systems. The module involves filling the enclosure with a cooling liquid that directly contacts the battery. A liquid cooling plate with flowing medium cools the battery further.

What is an immersion cooling system for lithium ion batteries?

An immersion cooling system for lithium-ion battery packs that uses glycol-based coolant and a sealed case to cool the batteries uniformly and efficiently. The battery pack has cells held by cell holders inside a sealed case filled with coolant. The coolant surrounds the cells and circulates to extract heat.

What is immersion cooling energy storage battery cabinet?

The enclosure can also be filled with dielectric fluid to further submerge the cells. Immersion cooling energy storage battery cabinet to improve heat exchange efficiency and stability of immersion cooled battery systems. The cabinet has a housing with an accommodating cavity for the battery module.
