

How do I install an energy meter?

Detailed information is available in the CCGX manual chapter 5.2. An Energy Meter can be installed in the main distribution panel between the grid and the installation for a full or partial grid-parallel installation.

How do I set up an ESS system?

There are a few different ways to set an ESS system up. A combination of these are possible as well: See below drawings to get an idea of all possibilities. The first drawing shows the wiring when a MultiPlus-II is used; and the second one shows how it is wired with a MultiPlus or Quattro.

How do I use ESS battery life?

Connect to AC when available, keep batteries charged: Use ESS Assistant and select the "Keep batteries charged" mode. o Not available in the ESS System yet, but it will be implemented. The ESS BatteryLife feature will make sure that the batteries are not unnecessarily cycled around a low SoC.

How do I keep my batteries charged if I use ESS?

Policy 2: Keep batteries charged: Use ESS, select the "Keep batteries charged" mode. And enable "Feed-in excess solar charger power" Policy 4: Prevent feeding energy to the grid: There are two options here; first - use ESS, but do not enable Solar charger excess feed-in and it will always be connected to the grid.
