## Energy storage charging pile only has 59 volts

What is the power of a charging pile?

Power and compatibility The power of a charging pile refers to the maximum amount of electrical energy that can be output per hour, in kW or "kilowatts". AC charging piles are generally divided into 3.5kw,7KW,11kw,and 22KW specifications according to power.

Can battery energy storage technology be applied to EV charging piles?

In this paper, the battery energy storage technology is applied to the traditional EV (electric vehicle) charging piles to build a new EV charging pile with integrated charging, discharging, and storage; Multisim software is used to build an EV charging model in order to simulate the charge control guidance module.

What is energy storage charging pile equipment?

Design of Energy Storage Charging Pile Equipment The main function of the control device of the energy storage charging pile is to facilitate the user to charge the electric vehicle and to charge the energy storage battery as far as possible when the electricity price is at the valley period.

Can energy-storage charging piles meet the design and use requirements?

The simulation results of this paper show that: (1) Enough output powercan be provided to meet the design and use requirements of the energy-storage charging pile; (2) the control guidance circuit can meet the requirements of the charging pile; (3) during the switching process of charging pile connection state, the voltage state changes smoothly.

How many volts does an AC charging pile need?

AC charging piles are generally divided into 3.5kw,7KW,11kw,and 22KW specifications according to power. The more precise definition of the 7KW specification is 220V/32A/7kw,which is also the most common specification at present. Charging piles above 7kw require a 380V meter.

How does the energy storage charging pile interact with the battery management system? On the one hand, the energy storage charging pile interacts with the battery management system through the CAN busto manage the whole process of charging.
