

Is revenue a materiality benchmark?

The Group is in a loss making position and focused on expanding revenue. Revenue is considered to be an appropriate materiality benchmark and constitutes a key performance measure. Given the nature of business activity, a lower level of performance materiality was considered appropriate.

Can energy storage enhance integration of renewables?

In March 2023 the U.S. Department of Energy ("DOE") published its "Pathways to Liftoff" paper presenting how various forms of energy storage can enhance integration of renewables. That paper was strongly supportive of storage that delivers inter-day shifting of renewable energy, the segment where Invinity focuses.

Which share plan remains outstanding at 31 December 2023?

The primary share plan that remains outstanding at 31 December 2023 is the 2018 plan. The 2018 plan was adopted by the Board on 14 May 2018 and introduced HMRC scheme rules related to certain non-taxable option grants. The plan contains a provision to issue options as CSOP, EMI or unapproved awards.

Is tax based on a Consolidated Statement of profit & loss?

Taxation is recognised in the consolidated statement of profit and loss except to the extent that it relates to a business combination or items recognised directly in equity or other comprehensive income. The current tax charge is based on the taxable profit for the year.

Which LDEs segment will deliver the most energy to the grid?

In June 2023, the Invinity team presented a whitepaper based on the U.S. DOE's analysis at the International Flow Battery Forum which identified the inter-day LDES segment as the one that would deliver the largest amount of energy to the grid by 2040.

Does energy SuperHub save carbon?

In July 2023, Energy Superhub Oxford published data for its first year of operation, noting particularly that it saved c.732.66 tonnes of carbon (the equivalent of planting 4,300 trees) and had provided over 1.1 GWh of power to local residents.

Greening modern rice farming while improving productivity and reducing chemical use is a desirable goal for sustainable agriculture. This paper analyzes the impact of vermicomposting on productivity and efficiency of modern rice farming using a random sample of 340 farmers from the southwestern region of Bangladesh by applying a stochastic production ...
