The cost to charge your electric car with grid energy, will vary depending on your energy tariff and car battery size. For example, if your tariff is 30p per kWh and your battery is 100 kWh, the cost to fully charge your car would be approximately £30. You can estimate these costs by multiplying the tariff by the battery size, and dividing this by 100 (i.e. $30 \times 100 = 300 / \dots$

They replace the current roof top. So you could go straight to the solar panels, or wait on the roofing upgrades, until you can afford panels. I have purchased a skid as funds become available. This way you can start earning some income back & slowly add panels to finish more as you go.
