

Why does Fiji need a new energy strategy?

Since, Fiji is completely dependent on imported fossil fuels for its transportation needs and 33% dependent on electricity generation, it has to import despite increasing costs. In addition, it cannot control the global prices. To overcome challenges in energy sector, Fiji needs to come up with strategies.

What is the Fiji rural electrification support project?

The Fiji Rural Electrification Support Project will expand and upgrade a mini-hydropower facility and install a solar photovoltaic-based mini-grid together with battery energy storage system in remote locations.

Why should Fiji invest in solar power?

By harnessing the abundant solar resources of the region, this project aligns with Fiji's national target of achieving 100% renewable electricity and its international commitments to reduce greenhouse gas emissions by 30% by 2030, thus improving living standards, health outcomes, job creation, climate resilience and food security.

Where is Fiji's New solar plant located?

This new solar plant is situated at the Mua Research Centre in the north of Taveuni, an international centre for palm and coconut research owned by the Fijian Government and is poised to bolster the island's existing generation capacity.

Who owns ADB in Fiji?

Established in 1966, it is owned by 68 members--49 from the region. ADB and the Government of Fiji today signed a grant agreement totaling \$3 million to help Fiji gain better access to renewable energy through the Rural Electrification Support Project.

How much money will ADB give to Fiji?

The Japan Fund for Prosperous and Resilient Asia and the Pacific will provide \$3 million grant financing to be administered by ADB. The Government of Fiji will contribute \$400,000 in counterpart financing.
