

What is static electricity & how does it work?

Static electricity is the build up of an electrical charge on the surface of an object, which results from unequal positive and negative charges between two objects. While static electricity may seem unavoidable and relentless, especially during the dry winter months, eliminating static electricity is a lot easier than you would think.

How can I prevent static from building up in my home?

You can prevent static from building up in the first place simply by incorporating more cotton fabrics into all your home textile needs. "100% cotton fabrics are less likely to create static electricity compared to synthetic fibers," says Parima Ijaz, textile expert and founder of Pure Parima.

How do you reduce static electricity?

Use a humidifier. Static electricity is more active when the air is dry, especially in the winter months when people heat their houses, further reducing humidity in the air. Increase the humidity in your house and workplace by using a humidifier. The moisture in the air can help reduce static charge from building up.

How do you stop static from accumulating?

Try to also bring in conductive materials, like grounding wristbands or conductive mats in areas prone to static build-up. This technique will also help release static electricity safely, Ijaz explains. And, simply by walking barefoot or wearing leather-soled shoes, you can also reduce static accumulation, she says. 8. Upgrade Your Laundry Routine

Can a humidifier reduce static electricity?

Use Humidifiers Since dry air is a major cause of static electricity, "using a humidifier to maintain a higher level of humidity (ideally 30-50%) in your home can significantly reduce static," Ijaz says. To get the best effect, place humidifiers in rooms where you're experiencing the most static, like living rooms, bedrooms, and laundry spaces.

How do you get rid of static cling?

It's true that rubbing dryer sheets on your clothes can actually help neutralize their static cling. "You can even use dryer sheets on upholstered furniture and curtains to reduce static build-up," Ijaz says. 5. Try Anti-Static Sprays Another great trick to get rid of static around your home is to utilize static-eliminating sprays.
