

How much is the national standard car lead-acid battery

Lead acid batteries are one of the most common types found in vehicles. Durable and relatively cheap to replace, these 20,000 start batteries will last a long time before they'll need to be replaced, plus they're covered by a 3 year guarantee.

Standard lead-acid battery: Suitable for most cars with regular driving patterns. AGM battery: Ideal for vehicles with high electrical demands or stop-start systems.

If you browse new car batteries for sale, you'll see a plethora of options - and the sheer volume of choice can be overwhelming. Lead-acid batteries, absorbent glass mat batteries, silver calcium batteries, enhanced flooded batteries, lithium-ion batteries, and more, all feature differing chemistries and construction.

Car batteries come in various types, such as lead-acid, gel, and lithium-ion packs, each with different capabilities like cold-cranking amps and life spans. Opting for a high-end lithium-ion battery pack might increase costs but offers longer service life and better performance in ...

Standard lead acid batteries stand as the conventional and widely used type of car batteries, prevalent in both cars and vans. Renowned for their durability and reliability, they prove to be a dependable choice, especially for vehicles without start-stop technology and those with lower power demands.

Typically found in slightly older vehicles, non start stop batteries are the traditional type of batteries that are also known as standard lead acid. We have non start-stop batteries from some of the biggest brands in the business including Varta, Bosch and Exide.

Standard lead-acid batteries are cheaper than premium options like AGM (Absorbent Glass Mat) batteries, which can cost upwards of £200. Larger vehicles or those with complex electrical systems may require more expensive batteries.

The cost of a replacement 12-volt car battery can range from around £45 for a basic lead-acid unit, to £250 for a lithium-ion or AGM battery. Smaller hatchbacks will generally require smaller capacity batteries, while luxury cars with more complex electronics and stop/start systems will need higher capacity items.

You can get a new battery from just £61 - and if you find the same one cheaper elsewhere, we'll match it. Your actual Nissan car battery price will depend on what battery you need. You can get a quick idea using our battery search tool, including information on hassle-free fitting and disposal.
