

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can solar panels be installed on a roof?

Building regulations require solar panels to only be installed if there is structural integrity. This clearly states that the roof must be examined to confirm it can hold solar panels. An installer is essential to check the weight of the solar panels that will be supported by the roof.

Can I use solar roof tiles instead of solar panels?

What you need to do is speak to your local council and let them know about your decision to install. Unless there is a valid reason to state otherwise, permission for the installation should be granted. In some conservation areas (such as historical ones), it may be requested that you use solar roof tiles instead of panels.

How far can solar panels protrude from a roof?

Panels must not protrude more than 200mm from the roof. This helps to protect the appearance of the building. The solar panels must not affect the structure of the roof or the appearance of the property. A certified installer must confirm the roof can bear the weight of solar panels.

Do I need a prior approval for a solar panel installation?

Application to determine if prior approval is required for a proposed: These provide more scope for solar panel installations on buildings (or in the curtilage of a building) and in non-domestic off-street parking areas without needing full or householder planning permission. When will you need to make a prior approval application?

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Most of the time, it isn't necessary to apply for planning permission for solar panels, as they are a "permitted development". ... Solar PV panels can be installed on a flat roof.
