

How to benefit from installing solar panels

Are solar panels a good idea?

Installing solar panels is a great idea to increase your home's capacity for renewable energy, and possibly save money on your energy bills.

Can solar panels save you money?

Solar panels could help you save £100s a year on your electricity bills. Using the energy you generate can mean big savings for some households. You can get paid to export electricity you generate but don't use through the smart export guarantee (SEG). An average home could earn up to £320/year.

Why do people install solar panels?

Solar panels are often marketed as a way to save money on electricity- and sometimes as a way to make money too. This is because you can get paid for the electricity they produce that you don't use. Of course, many people install solar panels for other reasons.

Are solar panels a good investment?

Solar panels on their own offer lower electricity bills and clean energy. But they're at their best when combined with other renewable technologies. Store excess solar electricity in the day that you'd have otherwise lost. Use this stored energy to avoid more expensive tariff periods.

How do solar panels work in the UK?

Installing solar panels lets you use free, renewable, clean electricity to power your appliances. You can sell extra electricity to the grid or store it for later use. There are over 1.3 million installations on homes across the UK - see where the UK solar panel hotspots are. Let's look at how they work and whether they're suitable for your home.

Should you install solar panels on a different home?

It's also worth noting solar panel installations are tailored to each home - to fit the roof and be positioned to maximise the level of sunlight they receive - so it's likely they wouldn't perform as well if you installed them on a different home anyway.
