

What should I do if my solar lights are not working?

Observe the solar lights during the evening to check if they illuminate as expected. If the lights still do not work, consider checking other troubleshooting steps, such as cleaning the solar panels, inspecting wiring connections, or replacing batteries.

How to fix outdoor solar lights?

Here is a step-by-step guide on how to fix outdoor solar lights: Ensure that the solar panels receive adequate sunlight during the day. Clear any obstructions that may cast shadows on the solar panels, hindering charging. Clean the solar panels regularly to remove dirt, dust, or debris that can affect efficiency.

Why is my solar street light flashing?

1. The green light flashes. First check whether there is strong light around, or whether the moonlight is very bright. If there are two cases, remove the strong light or remove the solar street light; if there is no strong light around, you need to replace the controller. 2. The red light is flashing and the load is not on.

How do I Reset my outdoor solar lights?

Resetting outdoor solar lights is a simple process that involves turning off the lights and disconnecting the batteries to allow the system to reset. Here's a step-by-step guide on how to reset outdoor solar lights: Locate the on/off switch on each solar light. It is typically located on the underside or near the solar panel.
