

Can you use stretch release adhesive on a battery?

Avoid applying adhesive over ribbon cables or delicate surfaces like NFC or wireless charging coils. Avoid applying adhesive too close to sensitive components. The stretch release adhesive strips will be applied to the rear of the replacement battery, and may need to be cut to length.

How do you attach a pre-cut adhesive strip to a battery?

If your pre-cut adhesive strip has pull tabs on the outer perimeter, the adhesive will attach to the battery first. Peel the clear plastic liner off of the pre-cut adhesive strip, exposing the adhesive. Line up a long edge of the adhesive with the proper surface, as determined above. Carefully set the adhesive down on the surface.

What happens if there is no adhesive on the battery?

Because if there is little to no adhesive you risk having the volume /power button ribbon /flex cables being cut from all the friction caused by the battery moving around. There is even a chance for the battery ribbon cable to be cut from this too.

How do you remove adhesive strips from a battery?

Once they adhere to the battery, they can't be removed and realigned. Place the battery face down on a flat surface. Starting at the cut end of the adhesive strips, peel off the large blue film covering the strips. Use a pair of tweezers to loosen the blue layer if you have trouble starting near the cut section of adhesive.

How do you attach a battery to a car battery?

Using your fingertip, gently roll the adhesive strips over the bottom edge of the battery, toward the back. Don't pull or stretch the strips as you apply them. Lay the strips down flat on the back of the battery. Use your fingers or a cloth to press the strips firmly into place along the back of the battery.

How do you attach a pre cut adhesive strip to a phone?

If your pre-cut adhesive has pull tabs facing the center hole, the adhesive will attach to the phone's battery well first. If your pre-cut adhesive strip has pull tabs on the outer perimeter, the adhesive will attach to the battery first. Peel the clear plastic liner off of the pre-cut adhesive strip, exposing the adhesive.
