

Do solar panels have a Smart Export Guarantee (SEG)?

The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme. What is the Smart Export Guarantee?

How much do solar panels cost to export?

Find out which energy companies have the best rates. The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to as much as 40p per kWh. That means that if you've got solar panels, choosing the best export tariff could earn you hundreds of pounds extra in payments every year.

Can solar energy be exported back into the National Grid?

But that excess energy can be used elsewhere, by exporting it back into the National Grid, which then distributes it to wherever it is needed. The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme.

Are solar export tariffs profitable?

This initiative compels energy suppliers with 150,000 customers or more to pay households for any renewable energy - including solar electricity - they export to the grid. But some companies have now released solar export tariffs that are more profitable than other SEG rates, making them the best export tariffs around. How much will I get paid?

Do I need a battery if I export solar electricity?

If you do have a battery, but you're on a standard export tariff without time of use pricing, you'll simply want to ensure you use as much of your solar electricity as possible, as this will be more valuable to you than exporting it.

Can you sell solar energy in the UK?
