

Should Israel put solar panels on its roofs?

By Steven Scheer JERUSALEM (Reuters) - Israel is turning to its citizens to help produce electricity and profit from it as demand grows rapidly by putting solar panels on their roofs to take advantage of the sun as a key natural resource.

Does Israel have solar panels?

Most homes and apartments across Israel already have solar panels on roofs to heat water. At 3% annual growth in energy use, Israel is among the highest of Western countries, making it doubly important to keep up with demand while boosting the level of renewables in its energy mix.

Are solar panels profitable in Israel?

While the system can bring a double-digit return on investment for some, for the hundreds of thousands who own apartments in shared buildings, it is not yet profitable. Over the past few years, it has become more and more popular for homeowners in Israel to set up solar panels on their roofs or in their yards -- and for good reason.

How do solar panels work in Israel?

Israel only allows on-grid systems, which means you must approve connecting your solar panels to the electric grid in your area. Your electricity bill is calculated by how much electricity you consume and the monthly output from your solar panels. What's the process to get solar panels on my roof?

How to set up solar panels in Israel?

When setting up solar panels, the first step is contacting a company that installs solar systems. Today in Israel, there are many companies of this type in the growing market, and it is worthwhile to conduct thorough market research and get recommendations from others who have already been through the process.

Who is responsible for buying solar panels in Israel?

Citizens, businesses and municipalities will be responsible for buying the solar panels, which Eifer said usually leads to a break even in six years. He noted that Israel, which has sun most days of the year, has no other options for renewable energy unlike others where wind or hydro power are options.
