

Throwing away batteries causes issues with the environment if not done properly, and investing in rechargeable batteries can allow you to do your part for a greener future. Many rechargeable batteries can las...

Currently, the costs of a rechargeable battery pack which can store 20 kWh of energy is around \$4,000. Such a battery pack should have a lifetime of 10 years. So, over thirty years, three battery packs would need to be bought, costing a total of \$12,000 at today's prices.

It can be a pain - and a significant expense - to have to keep paying to replace batteries around your home. However, B&M has you covered. Head in store to stock up on budget friendly AA batteries, AAA batteries, specialist cell or button batteries and a range of other mini power sources for almost any device you can think of.

These rechargeable batteries are not only great for many household devices, that are designed to perform well for solar and garde... Duracell has been making reliable batteries for many years, and their move into the rechargeable game has been a successful one. Stop t...

We offer batteries in huge multipacks to help you save while you stock up to keep all of your household gadgets running for plenty of time to come. Keep an eye out for offers too, as we regularly hold sale events that will help you to save even more on everyday items like batteries.
