

How long does a lithium battery last?

The standard warranty period of lithium batteries is one year. If extended warranty is required, consult the SSD and evaluate the maximum service life of lithium batteries based on the battery model and application environment. Extended warranty can be provided within the service life and needs to be quoted.

What is a lithium battery warranty service?

Class 3 (types A and B) and Class 4 power grids are harsh power grid environments. The warranty service is the product assurance service provided within the product warranty scope to resolve lithium battery quality issues. The service includes help desk, remote troubleshooting, and lithium battery spare parts replacement.

What happens if a lithium battery fails during the warranty period?

Faulty parts replacement: During the warranty period, if an individual failure is caused by the lithium battery quality problem of Party B, Party B is responsible for delivering qualified parts to the receiving place agreed by both parties within the committed service level agreement (SLA).

Does bulging a battery cover under warranty?

Bulging of battery cell doesn't cover under warranty. Damage occurred due to force majeure / natural calamities. Battery which are found to be in deep discharged condition are not considered under the manufacturing defect & for same the warranty gets void.

What happens if a lithium battery is damaged?

The lithium battery is damaged, broken, or leaks due to improper operations or incorrect connection. Party A does not recharge the batteries in time and the batteries are stored longer than the storage term, which causes capacity loss or irreversible damage to the batteries.

Thanks. Just one more question. Do you have an option to get a larger battery? Can you get the 40kwh battery? There was a leaf for sale that i should have purchased. It had a warranty replace with a 40kwh battery. They dealership selling it said it was replaced at a nissan dealer under warranty. It was a 2018 i think.
