

This special report by the International Energy Agency that examines EV battery supply chains from raw materials all the way to the finished product, spanning different segments of manufacturing steps: materials, ...

The evolution of cathode materials in lithium-ion battery technology [12]. 2.4.1. Layered oxide cathode materials. Representative layered oxide cathodes encompass LiMO₂ ...

The vigorous development of the new energy automobile industry has highlighted the issue of efficient recycling of power batteries. Using a Stackelberg game, the ...

As shown in Fig. 1, in 2015, new-energy automobile production and sales amounted to 340,471 and 331,092, respectively, and year-on-year growth reached 3.3 times ...

Latest GF New Energy Vehicles Battery ETF (159755:SHZ:CNY) share price with interactive charts, historical prices, comparative analysis, forecasts, business profile and ...

Abstract: Power battery is the most core and highest value of the key components of new energy vehicles, and the choice of power battery procurement channels is an important strategy for ...

With the rapid advancement of battery technology and the demand for environmental sustainability, new energy vehicles (NEVs) are becoming more and more ...

Third, this paper regards the greenness level of remanufactured batteries and consumers' green recycling awareness under the government regulations; then, we introduce ...

New Energy Battery Metal Extractant Market Is Expected to Grow at A Significant Growth Rate, And the Forecast Period Is -, Considering the Base Year As 10.4.1 Marketing Channels ...

The recycling entities of the waste power batteries of new energy vehicles generally include new energy vehicle manufacturers, retailers, third-party recycling ...

ers consider when purchasing new energy vehicles; (3) consumer demand for new energy vehicles is in line with Maslow's hierarchy of needs theory, starting from basic ...

With the yearly increasing market penetration of new-energy vehicles in China, the retirement of power batteries has gradually become a scale, and most of the waste ...

New energy tech providers offer an increasingly wide range of battery energy storage products and services. There are also a number of financing options and government incentive ...

We study the optimal channel choice and battery capacity allocation strategies of an electric vehicle (EV) manufacturer in the presence of battery recycling. The EV ...

In the same year, another project called "Ten cities and a thousand energy-saving and new energy vehicles demonstration and application project" ("Ten Cities, Thousand ...

The battery swapping mode is one of the important ways of energy supply for new energy vehicles, which can effectively solve the pain points of slow and fast charging ...
