

How many new energy vehicle drivers will be able to change batteries?

With about 1,300 charging piles, it is expected to serve over 500,000 new energy vehicle (NEV) drivers, according to State Grid Jiangsu Electric Power Co., Ltd. Battery swap facilities, which allow vehicles to change batteries in just 80 seconds, will also be introduced, starting with Wuxi, before being promoted across the entire zone.

Why should a battery swap conference be held?

It will also promote the wider use of battery swap technology and continue to support the battery industry. The two sessions is also an opportunity for enterprise leaders (both private and state-owned) to present policy recommendations to the country's top political and advisory bodies.

How long does it take a car to change batteries?

Battery swap facilities, which allow vehicles to change batteries in just 80 seconds, will also be introduced, starting with Wuxi, before being promoted across the entire zone. Previously, EV drivers often had to search for nearby charging stations.

Where is China's first EV charging & battery-swapping demonstration zone located?

(Xinhua/Ji Chunpeng) NANJING, March 6 (Xinhua) -- Construction of China's first smart electric vehicle (EV) charging and battery-swapping demonstration zone has been completed in the eastern province of Jiangsu, and will shorten queuing time needed for EV charging. The zone covers nearly 500 square km in the cities of Suzhou, Wuxi and Changzhou.
