

How to build Chinese new energy automotive brands?

To build Chinese new energy automotive brands, we need to adopt effective evaluation methods that comprehensively assess the mainstream styles in both quantitative and qualitative ways (see Fig. 2). Fig. 1. Trend of penetration rate in the Chinese new energy market. Fig. 2. Evaluation model combining KE and AHP.

How to design a new energy vehicle?

Product reference and alignment with consumer preferences are essential for the aesthetic design of new energy vehicles (NEVs). Analytic Hierarchy Process (AHP) and Kansei Engineering are used in this process. By building an evaluation system and allocating weights, AHP systematically ranks and compares elements of new energy vehicle design.

Do new energy vehicles have positive design research?

Many scholars primarily focus on positive design research during the study of product aesthetics. Moreover, research on the evaluation of the styling of new energy vehicles is relatively scarce, especially concerning mainstream Chinese new energy automotive brands. Scholars mainly investigate users' sensory responses during new product development.

How do new energy vehicles differ from traditional cars?

New energy vehicles, as emerging products, have distinct differences in their internal and mechanical structures compared to traditional fuel-powered cars. These differences inherently influence their exterior designs, resulting in variations between the aesthetics of traditional and new energy vehicles.

Are BYD electric cars automatic?

All BYD electric cars are automatic. This is a common standard across the EV market as electric cars don't require gears or a clutch to power the vehicle. As a result, there are only two pedals: the accelerator and the brake. Does using the aircon or heaters in an electric car reduce its range?

Do BYD electric cars have a 5-star rating?

Many BYD electric cars have a 5-star rating in Euro NCAP tests. There are a few factors to consider before choosing the perfect EV for you, so you can get from A to B reliably. Whether you're looking for an EV for the commute to work or to use as a family car, our guide will help you on your journey to purchasing the best electric vehicle.

Video: New type of battery could outlast EVs, still be used for grid energy storage. Researchers from Dalhousie University used the Canadian Light Source (CLS) at the University of Saskatchewan to analyze a new type of lithium-ion battery material - called a single-crystal electrode - that's been charging and discharging non-stop in a Halifax lab for more ...

In addition to the Blade Battery and CTB technology, BYD will also launch another safe and novel pioneering technology which will be equipped for the first time ...

Battery Swapping to Become Major NEV Charging Method, CATL's Founder Says ... Dec. 19 -- Battery swapping will become one of the major charging methods for new energy vehicles, according to the founder of ...

Worldwide, yearly China and the U.S.A. are the major two countries that produce the most CO₂ emissions from road transportation (Mustapa and Bekhet, 2016). However, China's emissions per capita are significantly lower about 557.3 kg CO₂ /capita than the U.S.A 4486 kg CO₂ /capitation. Whereas Canada's 4120 kg CO₂ /per capita, Saudi Arabia's 3961 ...

Find and configure your perfect BYD electric vehicle, book a test drive, find financing and configure online. BYD has developed groundbreaking blade battery, electronic platform 3.0 ...

Solid-state batteries have long been touted as the technological breakthrough that electric car makers are striving to bring to market. Finally, it looks like 2025 could ...

Avatr showcases its first model on Monday in Shanghai. [Photo provided to chinadaily .cn] Chinese carmaker Changan has unveiled a new electric car brand in collaboration with technology giant Huawei and battery ...

New 84kWh battery; Fresh styling with "Star Map" headlights; Costs from \$45,575; Three years on from its launch, the Kia EV6 has received a mid-life facelift to keep it fighting fit for 2024 ...

The number of new car registrations in the country reached 8.1 million in 2023, a 35% increase from 2022. In the first quarter of 2024, China accounted for 52% of global ...

At BYD, our electric vehicles are different; our industry-leading battery technology marries perfectly with innovative design to create a range of EVs that are as safe as they are luxurious. ...

Rival Nio launched a semi-solid pack for its ET7 saloon earlier this year, which offers more than 650 miles of range per charge. But what about the brands you can actually ...

Don't dismiss Chinese cars as cheap - these 12 brands have decades of manufacturing experience between them and some of the hottest tech on the market. ... Save up to \$15,000 on ...

Deepal is a new energy vehicle brand under the Chang'an Automobile Group. The brand is aimed at the Z-generation. Electric Car Models. Some of the electric cars manufactured and sold by Deepal include: S7; SL03; ...

This new facelift, complete with a bigger battery, revised styling and some cabin updates, should bring the EV6 up to date with those models and keep it competitive in an ever-growing market...

Evaluation of electric car styling based on analytic hierarchy process and Kansei engineering: A study on mainstream Chinese electric car brands ... by integrating objective evaluation and emotional analysis results, we assessed the design for each new energy vehicle brand. The results of this study are important for developing the new energy ...

From BYD to Omoda and GWM Ora, these new automakers available to UK drivers represent an approach to car making that feels very Gen Z - with futuristic shapes, bubbly and innocent-looking body features and tonnes ...
