

New energy large screen displays battery failure

Why is my monitor not showing my energy use?

If your monitor turns on but isn't displaying your energy use, it's probably struggling to connect to the smart meter. Try these tips: Plug in the monitor closer to your electricity meter (if you can). Some displays have an indicator showing how strong the signal is from your smart meter.

Why is my smart energy monitor displaying a message 'not commissioned'?

If your smart energy monitor is displaying a message saying 'Not commissioned' or 'Connecting to smart meter', it is because it hasn't successfully been joined to the smart meter network. Please contact us so we can fix this for you. If the 'system status' screen shows the cloud symbol in red or amber, this could mean one of the following:

What if my Smart Energy Monitor is damaged?

If there is physical damage to your smart energy monitor screen or plug, please contact us. We may be able to replace your smart energy monitor. If you've switched tariffs or your tariff's price has changed, it can take up to 7 days for your monitor to show a change in rate prices.

What happens if my smart meter monitor is not working?

If your monitor isn't working, it doesn't affect your smart meters or energy supply. You won't be cut off, and usually you won't need a new smart meter. Here's how to read your smart meter if it isn't sending automatic meter readings. If the screen on your smart meter monitor has gone blank, first check whether it's connected to a power supply.

Why is my Smart Energy Monitor not showing gas data?

This is because the smart energy monitor isn't designed to show gas data more than 70 minutes old. If your monitor has lost Wi-Fi connection, you'll see a red cross on the screen next to the Wi-Fi icon. Please check the Wi-Fi connection as this is usually a local issue. If you're unable to solve it please contact us.

Why is my smart meter display blank?

What happens is that smart meters have internal batteries to maintain maximum operation during power outages or for the power to display, so if the battery is weak or faulty, the meter won't be able to display. If your electric meter display is blank, use any of the measures below to get it fixed.

Cerbo GX Manual 10. Marine MFD integration by App 10.1. Introduction & requirements A Glass Bridge is a MFD (Multi-Functional Display) that integrates a boat's systems and navigation status into a large screen or screens at the helm of the vessel, so doing away with multiple gauges, brackets and wiring complications.
