

What are battery warning labels?

Battery warning labels are adhesive indicators on battery packaging specifically designed to alert handlers and consumers about the potential risks associated with batteries. These labels contain hazard information and handling instructions, which are crucial for safe transport, especially for lithium batteries.

What are the different types of battery labels?

Lithium battery labels: For lithium-ion and lithium-metal batteries, indicating specific hazards and handling precautions. Cargo aircraft only labels: For batteries restricted to cargo planes. Handling labels: With detailed handling instructions to prevent accidents. Shipping batteries is more complex than shipping other goods.

What is a lithium battery hazard label?

These labels contain hazard information and handling instructions, which are crucial for safe transport, especially for lithium batteries. They are designed to be highly visible and resilient, capable of withstanding any environmental conditions that might occur during transportation.

Do I need a label for my batteries?

The label must be clearly visible on the outside of the packaging. Additional labels may be required depending on the mode of transport. For example, air shipments might need a "Cargo Aircraft Only" label if the batteries are not allowed on passenger planes.

Why should you buy pre-printed battery labels for your business?

You'll save time and money by ordering pre-printed battery labels for your business. They're printed on durable film labels, so they're sure to last. Battery warning labels are critical for safe battery transportation, ensuring regulatory compliance and risk communication.

Do batteries need to be marked?

Some shipments may require overpack markings, especially if the batteries are packed in larger containers. The word "OVERPACK" must be clearly marked if the outer packaging obscures the required labels on individual battery packages.

PRODUCT PACKAGE: Photovoltaic Solar System Installer Label Kit Quantity: 48 Pack Material: High performance vinyl. Heavy-Duty Vinyl with Protective UV Laminate Size: ...

Outdoor DC UPS with 12V OUTDOOR POWER BACKUP FOR 12V TELECOM DEVICES. ... The DC UPS is capable of automatically charging internal batteries to provide battery power for connected equipment during a power outage, ...
