

How to maintain solar panels at home?

You can maintain your solar panels at home by cleaning them regularly with a garden hose and a non-abrasive cloth and by inspecting them for any dirt, debris, or damage. You should also turn off your solar power system before cleaning and avoid doing it on hot, sunny days.

How to install wall-mounted solar panels?

To maximise energy absorption, you need to make sure to install the wall-mounted systems strategically. You can do this by placing the solar panels directly parallel to the wall, tilting them away from the wall or overhanging them. The natural slope of wall-mounted solar panels requires special mounting hardware to ensure security.

How often should solar panels be maintained?

It takes all the hassle out of owning solar panels. If you don't have a maintenance support package from an installer, you should consider arranging for an intermediate maintenance visit from an MCS contractor every 10 years, and a full maintenance visit every 15 years.

Are solar panels difficult to maintain?

No, solar panels are not difficult to maintain. Simple cleaning with soft water and a microfiber cloth, combined with a routine inspection to look for damage from pests or extreme weather, is all that's required. Many owners of residential solar power systems perform maintenance on the photovoltaic array themselves.

Do solar panels need maintenance?

Solar panels have no moving parts, which makes them relatively low maintenance. But if you want to reduce solar panel costs and maintenance over time, you'll need to look after them. Here are a few things that you should do to keep your panels in tip-top condition:
