Otsuka Pharmaceutical Factory introduces a self-consuming solar power generation facility that contributes to CO 2 emission reductions to its Kushiro Factory September 25, 2020 Otsuka Pharmaceutical Factory obtains marketing approval of ENEFLUID Injection, the amino acid, glucose, electrolyte, fat, and water-soluble vitamin injection September ...

Proper system design and sizing are essential when integrating solar power into your factory. Here's how to ensure optimal results: Analyze Your Energy Consumption Patterns. Start by identifying how much energy your factory uses during peak and off-peak hours. This ensures your system is sized to meet both current demands and future growth.

Calculations show that establishing a solar power plant on a factory rooftop for electric energy production and supplying this energy for melting 40% of glass using electrodes has the lowest energy consumption among all four cases. Results show that the most efficient and environment-friendly option for glass melting is electric melting ...
