

Who is Lithium Battery Power?

Lithium Battery Power LLC is a company called Lithium Battery Power with over thirty years of combined experience in the lithium battery manufacturing world. Founded in March 2018 by Bruce Dandrew, they proudly assemble all batteries in a Clearwater, Florida based warehouse and ship to tech savvy energy consumers around the globe.

What is the lithium-ion battery supply chain?

The southeastern United States is emerging as a critical region for the lithium-ion battery supply chain, as battery manufacturers and automotive OEMs establish operations in the region, which will lead to the generation of significant quantities of battery manufacturing scrap and end-of-life batteries available for recycling.

Can a G4 Li-ion battery be used as a battery?

Yes, it is possible to connect the G4 Li-Ion Batteries from Clayton Power as additional batteries. Is it possible to change the battery inside? No, the LPS is extremely compact and that is one of the reasons that it is not possible to change the built-in lithium battery, but it has a very long lifetime.

What is a LiFePO4 battery?

High-end and compact LiFePO4 battery cells with high energy density and long lifetime. The powerful and compact LPS provides power to your 230 VAC and 12 VDC appliances without the complexities of additional equipment. The LPS can be used in many setups and scenarios after your specific needs.

How many cycles can a 2 kWh battery run?

The lithium battery capacity of 1 kWh means that you can run an application with a consumption of 1000 W in one hour, 500 W for two hours and 250 W for four hours. A 2 kWh battery has twice the capacity. How many cycles can it achieve? The battery can handle 2000 cycles- which is usually equivalent to 10 years of use.

How much power does a LPS provide?

The powerful and compact LPS provides power to your 230 VAC and 12 VDC appliances without the complexities of additional equipment. Ultra compact. High power density. Rapidly recharged for every stop and every job. The built-in booster allows regeneration with 500 W from any alternator. 500 W standard. 1000 W Super Charger (extra).
