

Price of solar lighting project for self-built houses

Should you use solar panels when building a new home?

Today, when building a new home, it is required that you include energy saving measures and offsets such as cheap new build solar panels. These include solar panels or solar thermal systems. Solar panels do not need to detract from the attractiveness of your new build.

How much does a solar panel system cost?

The average package 3kW or 4kW solar panel system with battery, usually comes with a 4kW to 14kW battery. The average price of a solar panel system and battery ranges from £8,500 - £14,000 but can be considerably higher depending on the battery. If you want to include a storage solution you are going to have to pay more upfront.

Do solar panels increase the value of a home?

Yes, installing solar panels can increase the value of your home. Buyers are often willing to pay more for a property with a solar energy system because it reduces future energy costs. Studies show that homes with solar panels can sell for up to 4% more than comparable homes without them. Can I install solar panels myself to save money?

Can solar panels be added to a new build?

For new builds and self-builds, you'll likely be looking at solar photovoltaic panels and/or solar hot water (solar thermal) systems. Instead of looking at options to traditional heating systems, solar panel installations can be added to new builds to improve the EPC and overall energy efficiency.

What costs should you consider before installing solar panels?

There are two other potential costs you should look into before installing solar panels, these are maintenance costs and repair costs.

How much does solar PV cost?

Solar PV costs Only one of the government proposals for the Future Homes Standard will require solar PV installations, although it is worth being prepared for any potential costs this could incur. Solar PV systems typically range from £5,000 to £8,000 for a 4kWp system and upwards of £8,000 for a 6kWp system.
