

Does Saudi Arabia have a battery energy storage system?

The 2 GWh battery energy storage system (BESS) features 122 prefabricated storage units, designed and supplied by China's BYD. From ESS News Saudi Arabia has officially connected its largest battery energy storage system (BESS) to the grid, marking a significant milestone in the country's renewable energy expansion.

Why is energy storage important in Saudi Arabia?

Energy storage is a vital component of this transition, providing grid flexibility and enabling the integration of intermittent power sources such as solar and wind. The project is among several large-scale battery storage initiatives being developed in Saudi Arabia.

What is battery energy storage system (BESS)?

Battery Energy Storage System (BESS) plant will provide Load Shifting as main application while providing Black start, Frequency regulation and voltage support application through a selectable part of the system's total capacity for the network at their respective Point of Interconnection (POI). Following are the project locations:
