

What should I know before using the power bank?

Manuals+-- User Manuals Simplified. Carefully read the User Manual before using the power bank. Close supervision is needed when the power bank is used near children. Do not strike, hit or insert any foreign objects into the power bank or any of its ports. Do not expose the power bank to heavy rain/snow to avoid malfunction.

How much sunlight does a solar power bank need?

Minimum sunlight intensity 25,000LUX, 180ma charging current. NOTE: In theory, it needs around 56 hours to get the power bank fully charged with constant minimum 25,000lux sunlight. Yet it is advised to take the solar charging feature as the emergency back-up solution instead of main power sources due to sunlight intensity and panel conversion rate.

Can BLAVOR power banks be used for solar panel charging?

For solar panel charging, we recommend that you hang the power bank in a ventilated environment for solar charging to avoid swelling up of the battery due to extremely high temperature. All BLAVOR power banks have undergone extensive tests and the strict quality control procedure. Both our factory and products are tested and certified.

How do I turn on the power bank?

Basic operation: Turn on: single press the button, power bank on; when connected with device, the power bank will be on automatically. Turn off: if not connected with any device or device is fully charged, the power bank will turn off automatically after 10 seconds. Hold the button for 2 seconds to turn on the Flashlight.

How to charge a solar panel?

Solar panel 6. Output 2 2. LED lamp 7. Type-C input 3. Page 3 Instructions To ensure the stability of the power, please use the standard charger.
