

How much do solar street lights cost?

This considers costs for components, installation, maintenance, and electricity bills. During the 15-year lifespan, traditional lampposts cost around \$12,000. Solar street lights with motion sensors or different models, only cost around \$5,000-\$6,000 for that same period, making them cheaper and more cost-efficient.

What is the global solar street lighting market size?

The global solar street lighting market size is valued at \$5.7 billion with sales of 1,545.9 thousand lighting units in 2019 and projected to witness a CAGR of 9.4% during the forecast period (2020-2030). The declining price of solar street lighting solutions and increasing number of smart cities are the major growth driving factors.

Which category has the fastest growth in the solar street lighting market?

In 2019, the standalone category on the basis of structure type witnessed the fastest growth in the solar street lighting market, and is expected to maintain its pace over the forecast period. Moreover, standalone solar street lights are not connected with the grid for the power supply.

Why is solar street lighting market growing?

Growing vehicular traffic leading to massive investments in infrastructure development, especially roads and highways in countries like China, the U.S., Germany, and India, has been a major driver for the solar street lighting market growth. Also, the commercial vehicles sales increased by 2.2% in 2019, reaching 26.9 million units globally.

Are solar street lights the future of public lighting?

Solar street lights are a practical and convenient solution to replace old public lighting, and they are the future of public lighting. Solar street lights reduce costs in the long run, require low maintenance, can be installed in areas with no electrical infrastructure, and deliver many other benefits.

What are solar street lights?

The lighting fixture is commonly referred to as the bulb. To make better usage of solar energy, solar street lights use LED technology, because they are 68% more efficient than HPS fixtures. The energy produced from solar panels is stored in the batteries, and later on at night, is used by lighting fixtures, to illuminate public areas.
