

What's going on with solar PV prices in China?

In a new weekly update for pv magazine, OPIS, a Dow Jones company, offers bite-sized analysis on solar PV module supply and price trends. FOB China prices for both mono PERC M10 and TOPCon M10 cells extended decline this week, assessed at \$0.0417/W and \$0.0494/W, respectively, marking a decrease of 5.01% and 4.45% from the previous week.

Will China's crowded solar power sector keep global prices low?

Consolidation in China's crowded solar power sector is pushing smaller players out of the market, but excess production capacity - with more on the way - threatens to keep global prices low for years.

How big is China's cell production in July?

China's cell production in July was expected to reach 49-51 GW, down from 53 GW in June, according to the Silicon Industry of China Nonferrous Metals Industry Association.

How will cell prices change in May?

A prominent cell producer therefore anticipates that cell prices will keep decreasing in May, with TOPCon cells likely experiencing a more pronounced decline compared to the mono PERC cells, as the production output of the latter continues to shrink.

Why did China cut cell production rates in July?

Meanwhile, cell manufacturers continue to cut production rates in a bid to restore market supply and demand balance. China's cell production in July was expected to reach 49-51 GW, down from 53 GW in June, according to the Silicon Industry of China Nonferrous Metals Industry Association.
