

Do you offer a bespoke solar & battery storage installation service?

We offer a bespoke solar and battery storage installation service: we can install a new array of solar panels on your roof or in your garden, whichever is more appropriate for you. We can also supply and install the equipment you need to convert and store that solar energy, or sell it back to the grid.

How do I install solar panels & batteries?

Installing solar panels and batteries involves several key steps to ensure a successful setup that meets your energy needs. Begin by assessing your energy consumption and identifying the suitable solar panel type. Residential systems typically use monocrystalline or polycrystalline panels, each with its pros and cons.

How do I plan a solar panel system?

Planning your solar panel system involves understanding your energy needs and selecting the right equipment. Close attention to these factors ensures an efficient and effective solar setup. Start by calculating your average energy consumption. Gather your past utility bills for at least a year. Look for kWh (kilowatt-hours) used monthly.

How do you connect a battery to a solar system?

Connect the batteries to your solar system following these steps: Turn Off Power: Ensure the inverter and charge controller are powered down. Connect Battery Terminals: Use heavy-gauge cables to connect the positive terminal of the first battery to the positive terminal of the next battery.

Should you install a solar battery?

But perhaps you would prefer to retain all the energy you generate. Installing a solar battery means that instead of selling the electricity you generate back to the grid, you can conserve this energy to use when you need it—perhaps to power your home when the sun goes down or to charge your electric car.

Do you supply or install solar energy?

We can also supply and install the equipment you need to convert and store that solar energy, or sell it back to the grid. We also supply and install solar energy diverters such as the MyEnergi Eddi device to harness solar to heat your hot water via an immersion heater or to control your heat pump.
