

Do solar panels need periodic maintenance?

To ensure that these systems perform efficiently and last for many years, periodic maintenance is important, but often overlooked. Proper maintenance not only preserves system efficiency but also prevents costly repairs and prolongs the lifespan of solar panels, inverters, and other components.

Who should complete a solar energy inspection and maintenance checklist?

Inspection and maintenance checklists should be completed by the electrician performing the inspection, and a copy given to the owner for their records. Owners should keep records of all inspections and maintenance of their solar energy systems along with the documents provided when the system was originally installed.

How important is Solar System Maintenance?

Proper maintenance not only preserves system efficiency but also prevents costly repairs and prolongs the lifespan of solar panels, inverters, and other components. This guide aims to educate solar system owners on the importance of maintenance, providing practical insights, tips, and best practices for maintaining their solar energy systems.

Do you need a solar professional to maintain your solar system?

Safety is paramount when performing solar system maintenance. Therefore, it is always best to use a licensed solar professional. They will de-energise the solar system and disconnect it from the grid before performing any maintenance tasks to avoid electrical shocks.

Do I have to use my original installer for Solar System Maintenance?

No, You're not obligated to use your original installer for solar system maintenance, although sticking with them can have advantages like familiarity with your specific setup for more efficient service.

Should you hire a HIES installer for solar panel maintenance?

When you hire a HIES installer for solar panel maintenance, you can expect a comprehensive and meticulous inspection to ensure the optimal functioning of your system. Here's a simplified guide to provide a clearer picture of the services typically undertaken during an installer's maintenance check.
