## SOLAR PRO. Solar panel planning

Do I need planning permission to install solar panels?

The installation of solar panels and equipment on residential buildings and land may be 'permitted development' with no need to apply to the local authority for planning permission. There are,however,important limits and conditions,detailed on the following pages,which must be met to benefit from these permitted development rights.

Do ground mounted solar panels need planning permission?

Ground mounted solar panels won't need planning permission(they'll be covered under Permitted Development Rights) as long the installation adheres to the following: If your installation isn't going to abide by the above rules, then you'll need to apply for planning permission.

Do you need planning permission for solar panels in Scotland?

In Scotland, you won't usually need planning permission for domestic solar panel systems if they're below a certain size. However, you should confirm this with your local planning officer, especially if your home is a listed building, in a conservation area, or World Heritage Site.

Do rooftop solar installations need planning permission?

Rooftop solar installations always need building regulations approval, but rarely require planning permission. This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission.

Do I need a planning application for a solar panel system?

You must notify the Distribution Network Operator (DNO) of any installation. The size of the system determines the notification process. If a solar panel system is going to be greater than 50kWprior approval will be required from the Local Planning Authority. This is a much less prescriptive process than a planning application.

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.

Planning permission on the other hand is permission needed by a local planning authority when a solar panel installation doesn"t fall within Permitted Development Rights. What size commercial solar panel system needs planning permission? Any commercial solar panel system over 1 megawatt will need planning permission.

Planning permission for solar panels is generally not required for most UK homes, since homeowners can perform certain types of work under what are known as permitted development rights.; Wall-mounted solar
