

Can solar energy help alleviate poverty in Palestine?

Several groups and NGOs have already paved the way for the broader use of solar energy in Palestine. Sunshine4Palestine is a great example of how a group can utilize solar energy to help alleviate symptoms of poverty.

What is IFC's rooftop solar energy facility in Gaza?

The Palestine Real Estate Investment Co's (PRICO) rooftop solar energy facility is IFC's first large-scale solar energy installation in Gaza and is supported by the IFC-Canada Climate Change Program.

What is the largest solar installation in Gaza?

PRICO is the largest solar installation in Gaza and the first one for which an ad-hoc grid integration solution has been developed with the grid operator to ensure power evacuation and 24/7 continuity of supply. This is a standard-setting benchmark that is replicable and scalable in other locations.

Can the environment around the Palestinian territories help solve the energy crisis?

The environment around the Palestinian territories could potentially hold the key to mitigating the existing energy crisis, as well as reduce Palestine's energy dependency on its neighbors and bolstering the economic viability of Palestine as a more self-sufficient nation.

Is solar energy a good idea for Gaza?

With over 300 days of steady sunshine a year, residents of Gaza and the West Bank have increasingly turned towards solar energy as a way to power small, everyday appliances, such as electric fans and other forms of air conditioning. This is especially important during the summer months when temperatures soar.

Is Israel a viable solution to Palestine's energy crisis?

Palestine has a significant dependence on Israel and neighboring Jordan and Egypt for the majority of its energy demands. However, this system is not viable as a long-term solution.
