

Super capacitor energy storage inverter 12v

Why should you choose SIRIUS Super capacitor module?

Rapid charge translates into big savings on solar panels. Unsurpassed temperature tolerance from -25C to 85C. FOR THE ULTIMATE STORAGE SOLUTIONS The Sirius Super Capacitor Module practically charges as fast as your Inverter or charger allows - eliminates the need for large battery banks.

How fast does the SIRIUS Super capacitor module charge?

FOR THE ULTIMATE STORAGE SOLUTIONS The Sirius Super Capacitor Module practically charges as fast as your Inverter or charger allows - eliminates the need for large battery banks. The Sirius Super Capacitor Module can theoretically, depending on the model, be charged in less than 32 seconds without affecting cycle life.

How long does a Sirius super capacitor last?

The cycle life of the Sirius storage system is 1 million cycles at 100% DOD with negligible capacity fade and impact of charge/discharge rates. Combined with very low maintenance requirements, Sirius delivers power and energy at an unmatched cost per cycle. The Sirius Super Capacitor Module comes with a manufacturer 10-year swap-out warranty.

What temperature can the SIRIUS Super capacitor module operate?

The Sirius Super Capacitor Module can operate between -25 deg Celsius and +85 deg Celsius. With a temperature tolerance range that is higher than most chemical batteries, the Sirius Super Capacitor Module can be deployed in extremely harsh environments without cooling or heating, resulting in less oversight and maintenance.

Compatible Inverters Option Remark: *1 Cycle life would be shorter when operate at low temperature for long time. 2 Use low current below 0.5C when operated under 0 ~176°C.

For a capacitor in parallel with a 12V battery the total charge in the capacitor would be: $W = 1/2 * 88 * 13.4^2$ ---> 7900 Joules. But since the lowest voltage is the fully discharged level of the battery you can only access a portion of the stored energy: $W = 1/2 * 88 * (13.4 - 10.5)^2$ ---> 370 Joules. What a waste of an energy storage capability!
