

Who is Swiss battery?

Our company SwissBattery.com develops battery products and materials for the electric automotive & airspace market. Our target is top benchmarking. We focused at an early stage of the product development on energy use and cost. Our products are resilient in increasingly regulated and clean emerging markets.

What are Swiss battery engineers doing?

Swiss Battery engineers have secured multiple inventions that are substituting critical heavy-metals with tailor-made, renewable battery raw materials. Science is the basis of our discoveries and innovations.

Why is Switzerland a good place to buy Btry batteries?

For BTRY, which produces its batteries in a vacuum with a manufacturing technique used in semiconductor production, Switzerland is particularly attractive as a location because the country is renowned for its vacuum industry. "There is even the expression 'Vacuum Valley' used to refer to the St Gallen Rhine Valley.

What is Swiss battery used for?

The technology of Swiss Battery is suitable for a high-energy /high-power applications which can boost the range of electric airplanes. Electric aircraft are all sizes, from electric passenger airplane to all sizes of unmanned aerial vehicles (UAV) used for agricultural applications and defense.

Who makes Oerlikon stationary batteries?

Oerlikon Stationary Batteries Ltd. manufactures a full range of stationary lead-acid batteries, notably the valve-regulated Compact-Power(TM) family which has become a key component in telecom power equipment and a whole variety of other applications.

Which ETH spin-offs are making waves in the battery industry?

Two ETH spin-offs are making waves in this field: while BTRY develops high-performance solid-state batteries, 8inks is working on a new standard for production. The ETH and Empa spin-off BTRY develops fast-charging batteries that are resistant to temperature fluctuations and suitable for a wide range of applications.

The research group manufacturing technologies for battery production at BFH is focused on development of new sustainable and cost-effective production technologies for battery cells and other production lines supporting Swiss battery manufacturers. ... The Swiss Battery Technology Center brings a unique mix of experts from research and ...

Our patented, certified technology and industry-leading expertise distinguish our company and our high-quality products. Today, we are the world market leader in the production of rechargeable batteries for cochlear implants. ... as well as ...

Mit dem Swiss Battery Technology Center haben Unternehmen, die bessere Produkte für ihre Kunden und die ganze Welt entwickeln wollen, einen wichtigen Partner an ihrer Seite. Das Zentrum bietet während des gesamten ...

The newly founded production company SCB AG from Switzerland is revolutionizing the global battery market with its serially produced solid-state battery. Swiss Clean Battery AG, headquartered in ...

Swiss Battery Association iBAT. ... authorities and research institutions along the complete value chain from manufacturing to recycling and strengthens Switzerland's competitiveness in this core technology. ... Would you like to ...

Are you not happy with the status quo and keen to see disruptive Li-ion battery innovation? I-STATE offers superior solutions for automotive, micro-mobility, e-trucks, industrial, airspace, ...

This unique method enables fast charging and high energy storage and provides custom battery properties explicitly tailored to meet our customers' diverse needs. But it's not just about ...

We transform academic ideas to a successful industrialization toward mass production. Slip -In means the industry has not to change their entire manufacturing plant to implement a new innovation.

Companies interested in creating better products for customers and the world will find a vital partner in the Swiss Battery Technology Center. The Center provides support throughout ...

The article "Why Western Switzerland for Tech Companies: ... the iPrint Institute in Fribourg expert in additive manufacturing, or the Swiss Battery Center in Bern. In 2021 for instance, manufacturing accounted for approximately 18% of Switzerland's GDP, comparable to other industrial powerhouses like Germany. ...

Renata SA is a global leading manufacturer and supplier of primary and secondary micro-batteries and battery solutions. Company headquarters is located in Itingen near Basel, ...

Empa will collaborate with Battery Consult AG, a research and development company specializing in salt battery technology, and the Swiss Innovation Park Biel/Bienne (SIPBB) in the LISA project (Laser Joining of ...

ETH Zurich is celebrating big news from two battery companies that are spin-offs of university research. They are leveraging Swiss industry expertise that involves novel layered production techniques.

Libattion is a cutting-edge Swiss battery manufacturing company dedicated to pushing the boundaries of Upcycled energy storage technology. With a focus on innovation, sustainability, and ...

Battery Manufacturers in Switzerland. Renewable Energy Businesses in the World: Renewable Energy Businesses in Switzerland: ... 6V, and 12V monoblocs with a nominal capacity of 25 to 1600 Ah. The company has over 15 years in-depth expertise in VRLA technology and complies with the international quality ISO 9001 standard. Its products are ...

The battery cells are characterized by their high storage capacity (up to 400Ah) in a wide temperature range (-30°C to +55°C), high reliability and safety. Through extensive exclusive cooperation ...
